

Goldshield 24 Foaming Hand Sanitizer

Water-Stable, Alcohol-Free, Hand Sanitizer

Goldshield24 is FDA approved and proven to kill up to 99.99% of germs and common bacteria on the hands and to inhibit re-growth for hours following application.

- GS24 is a gentle, soothing, white foam that is earth-friendly, safe for kids, and has a shelf life of over 3 years.
- It's very economical to use because protection from a single application lasts for hours, significantly longer than alcohol which loses all effectiveness seconds after drying.
- Goldshield has been formulated to protect between hand washings by safely remaining on the skin's surface like an "invisible glove" providing continuous antiseptic and antimicrobial protection for hours.

Proper use of Goldshield is to Wash/Dry/Apply

Proper use of Goldshield is to **Wash/Dry/Apply**. Wash and dry your hands, then dispense one pump (a bottle contains approximately 160 pumps) in to the palm of your hand. Rub palms together being sure to rub around fingers and thumbs; don't forget under nails. Just before GS24 dries you'll experience a temporary, slight sticky feeling, this is proof positive Goldshield is working and will provide continuous antimicrobial protection for hours.

That's it. Instant action. Protects significantly longer than alcohol-based hand sanitizers.

Should there be questions about GS24, please inquire online at info@goldshield1.com.

Get Your Shield On!

	Water-Stable GS24	Alcohol-Based Products
Continual Protection	Yes GS24 safely remains on the skin because it bonds to the carbohydrates of the skin.	No Alcohol-based hand sanitizers lose 100% effectiveness the instant your hands are dry.
Antimicrobial/Killing Functionality	Yes GS24 kills on contact and is broad spectrum, i.e., kills most microorganisms.	Yes, but . . . Alcohol dries in 8-10 seconds and evaporates within 15 seconds; in this "delay time" many microbes regenerate.
Foam vs. Gel	Foam GS24 is a rich, gentle, white foam with a hint of a grape fragrance. Our 1.72oz bottle contains approx. 160 dispenses. GS24 is water-stable and will not sting, instead actually soothes the skin on contact.	Gel Alcohol-based products for the most part are gels that dry quickly as the alcohol evaporates. Once evaporated, alcohol's killing power is zero. Alcohol burns and stings when applied to wounds or minor cuts. A comparably sized alcohol gel container provides only approx. 30 dispenses.
Dries/Irritates the Skin	No GS24 noticeably softens and moisturizes the skin thus does not cause dryness, irritation or cracking.	Yes Alcohol removes natural oils from the skin thus causing skin irritation and even cracking with repeated use. Alcohol-based products have been demonstrated to break down skin cell structures.
Flammable	No GS24 contains no alcohol or other solvents or acids so it's not flammable.	Yes, Alcohol is highly flammable. Many facilities are removing alcohol-based wall dispensers due to dangerous combustibility.
Safe for Kids & Environmentally Safe	Yes GS24 will not leach into the blood stream and is environmentally-friendly.	Questionable Many schools do not permit alcohol because of flammability and drinking the substance. Alcohol leaches into the blood stream and is toxic.
